

Precision Ball Screw

Models BIF-V, DIK, BNFN-V/BNFN, DKN, BLW, BNF-V/BNF, DK, MDK, WHF, BLK/WGF and BNT

Point of Selection	A15-8
Options	A15-336
Model No.	A15-353
Precautions on Use	A15-358
Accessories for Lubrication	A24-1
Mounting Procedure and Maintenance	B15-104
Lead Angle Accuracy	A15-11
Accuracy of the Mounting Surface	A15-14
Axial Clearance	A15-19
Maximum Length of the Screw Shaft	A15-24
DN Value	A15-33
Support Unit	A15-300
Recommended Shapes of Shaft Ends	A15-308
Dimensions of Each Model with an Option Attached	A15-344

For THK Precision Ball Screws, a wide array of precision-ground screw shafts and ball screw nuts are available as standard to meet diversified applications.

Structure and Features

[Combinations of Various shaft Diameters and Leads]

You can select the combination of a shaft diameter and a lead that meet the intended use from the various nut types and the screw shaft leads. Those nut types include the return-pipe nuts, which represent the most extensive variations among the series, the compact simple nuts and the large-lead end-cap nuts.

[Screw Shaft Standard Products (Unfinished Shaft Ends/Finished Shaft Ends) Available]

The unfinished shaft end types, which are mass manufactured by cutting the standardized screw shafts to the standard lengths; and those with finished shaft ends, for which the screw shaft ends are machined to match the corresponding support units, are available as the standard.

[Accuracy Standards Compliant with JIS (ISO)]

The precision of the ball screw is controlled in accordance with JIS standards (JIS B1192-1997) and ISO 3408.

	Precision Ball Screw					Rolled Ball Screw		
	C0	C1	C2	C3	C5	C7	C8	C10
Accuracy grades	C0	C1	C2	C3	C5	C7	C8	C10

Type	Series symbol	Grade	Remarks
For positioning	C	0, 1, 3, 5	JIS series
	Cp	1, 3, 5	ISO compliant
For transport	Ct	1, 3, 5, 7, 10	

[Options that Meet the Environment are Available]

Options are available consisting of a lubricator (QZ), which enables the maintenance interval to be significantly extended, and a wiper ring (W), which improves the ability to remove foreign materials in adverse environments.

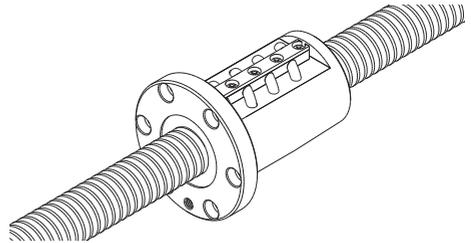

Types and Features

[Preload Type]

Model BIF-V

Specification Table⇒ **A15-184**

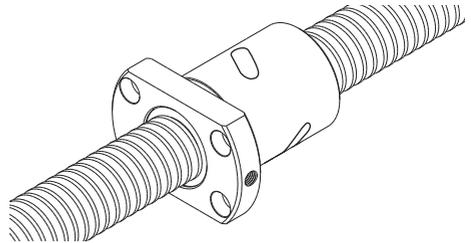

The right and the left screws are provided with a phase in the middle of the ball screw nut, and an axial clearance is set at a below-zero value (under a preload). This compact model is capable of a smooth motion.

Model DIK

Specification Table⇒ **A15-190**

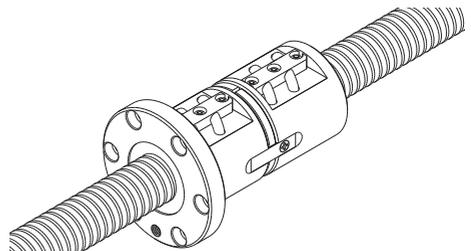

The right and the left screws are provided with a phase in the middle of the ball screw nut, and an axial clearance is set at a below-zero value (under a preload). This compact model is capable of a smooth motion.

Models BNFN-V/BNFN

Specification Table⇒ **A15-196**

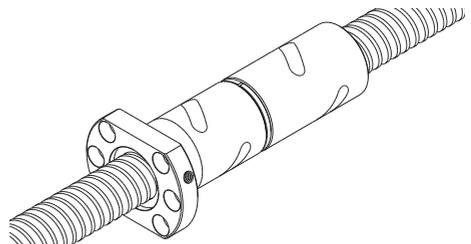

The most common type with a preload provided via a spacer between the two combined ball screw nuts to eliminate the backlash. It can be mounted using the bolt holes drilled on the flange.

Model DKN

Specification Table⇒ **A15-202**

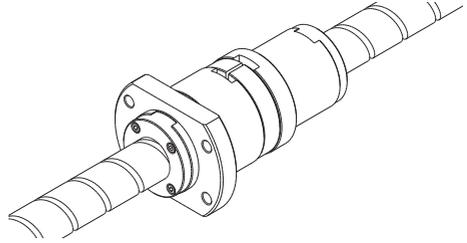

A preload is provided via a spacer between the two combined ball screw nuts to achieve a below-zero axial clearance (under a preload).

Model BLW

Since a preload is provided through a spacer between two large lead nuts, high-speed feed without backlash is ensured.

Specification Table⇒ **A15-203**

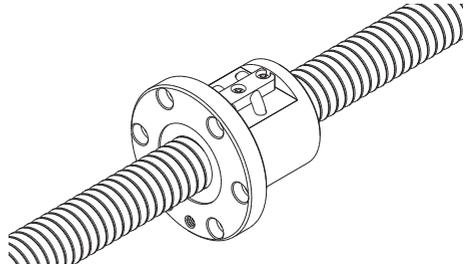

[No Preload Type]

Models BNF-V/BNF

The simplest type with a single ball screw nut. It is designed to be mounted using the bolt holes drilled on the flange.

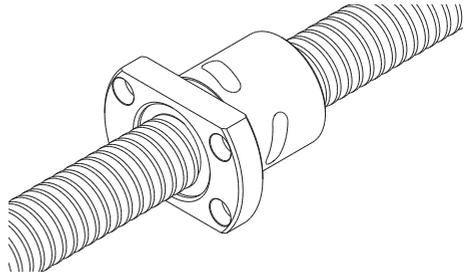

Specification Table⇒ **A15-204**

Model DK

The most compact type, with a ball screw nut diameter 70 to 80% of that of the return-pipe nut.

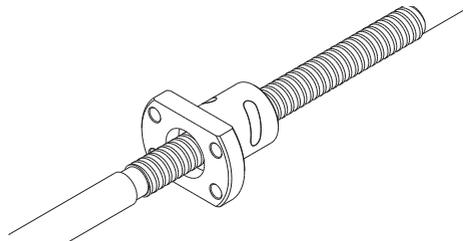

Specification Table⇒ **A15-214**

Model MDK

A miniature type with a screw shaft diameter of $\phi 4$ to $\phi 14$ mm and a lead of 1 to 5mm.

Specification Table⇒ **A15-222**

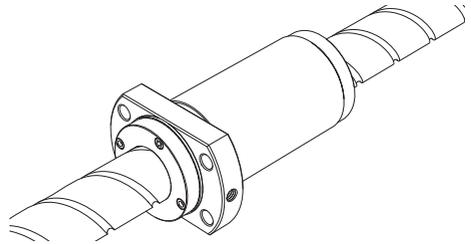

Model WHF

This Ball Screw for high-speed feed achieves a DN value of 120,000 by using a new circulation structure.

Since the nut outer diameter and the mounting holes of this model are dimensionally interchangeable with the previous model WGF, model WGF can be replaced with this model. (WHF1530, WHF2040 and WHF2550)

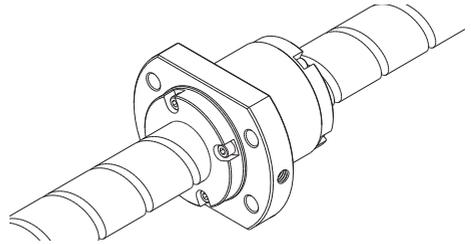

Specification Table⇒ **A15-223**

Models BLK/WGF

With model BLK, the shaft diameter is equal to the lead dimension. Model WGF has a lead dimension 1.5 to 3 times longer than the shaft diameter.

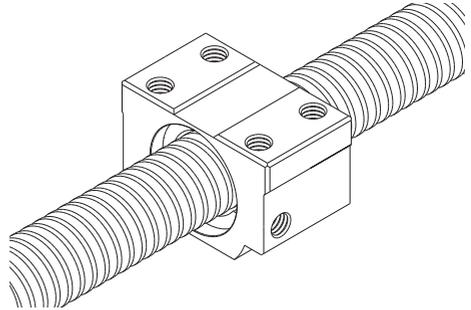

Specification Table⇒ **A15-224**

Square Ball Screw Nut Model BNT

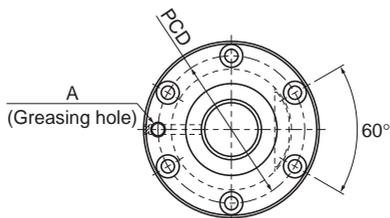

Since mounting screw holes are machined on the square ball screw nut, this model can compactly be mounted on the machine without a housing.

Specification Table⇒ **A15-228**

Note) Model WGF cannot be attached with seal.

The overall length of the nut will increase when equipping the QZ lubricating device. See [A15-344](#) for further details.

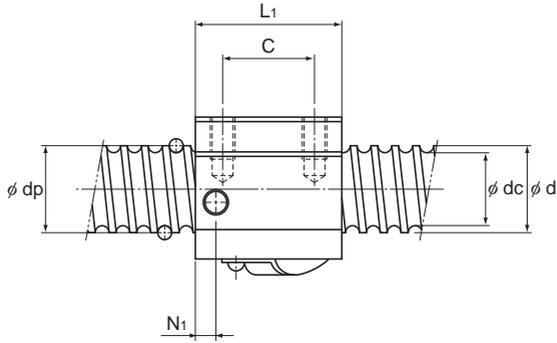

For model number coding, see [A15-230](#).
