○: Indicates model numbers able to handle high temperatures (with metal retainers, the operating temperature is up to 100°C).
Compatible model numbers: LBS20 to 100

(Example) LBS20 A CL+500L H
High temperature symbol

●: Indicates model numbers compatible with felt seals. Compatible model numbers: LBS20 to 100
Felt seals cannot be attached to ball spline models using metal retainers.
When equipping felt seals, the length dimensions of the nuts will change.

Model number coding

2 LBS40 UU CL +1000L P K

- 2: Number of spline nuts on one shaft (no symbol for one nut)
- LBS40: Model No.
- UU: Contamination protection accessory symbol [1]
- CL: Symbol for clearance in the rotational direction [2]
- +1000L: Overall spline shaft length[5] (in mm)
- P: Accuracy symbol [3]
- K: Symbol for spline shaft[4]

[1] $M_{A.1}$ indicates the permissible moment value in the axial direction when a single spline nut is used.
[2] $M_{A.2}$ indicates the allowable moment load value in the axial direction when using two spline nuts in contact with each other.
Note: For details on the maximum lengths of ball spline shafts by accuracy, please see A3-123.
