Note) ○: indicates model numbers for which high temperature types are available (with metal retainer; service temperature: up to 100°C).

(Example) LBST25 A CM+400L H

└ High temperature symbol

●: indicates model numbers for which felt seal types are available (see **A3-122**).

A felt seal cannot be attached to Ball Spline models using metal retainer.

Note) $M_{A,1}$ indicates the permissible moment value in the axial direction when a single spline nut is used, as shown in the figure above.

$M_{A,2}$ indicates the permissible moment value in the axial direction when two spline nuts in close contact with each other are used, as shown in the figure above.

For details on the maximum lengths of ball spline shafts by accuracy, please see **A3-117**.
